

# OFS + Intent Group

## Improving manufacturing with data you can trust

- Can you easily track, monitor, and benchmark the performance of your production and packing lines?
- Can you trust your current data to support investment decisions on new plant and equipment?
- Are you ready to digitise and fast-track your continuous improvement journey?

### Together we can help.

OFS, the leader in manufacturing performance software have partnered with Intent Group, a leader in delivering operational performance improvement. This will help New Zealand manufacturers implement digital solutions to drive efficiencies, so you can instantly see major challenges and opportunities on your production and packaging lines and act quickly.

### Data-Driven Analytics and Continuous Improvement. Together.

OFS collects live manufacturing performance data and displays this in real time on the factory floor. Combining this with operator insights and a host of analytics reports for management, OFS is an easy-to-use, fast to deploy software solution to help manufacturers of all sizes produce more product, more efficiently, and more sustainably.

### Your improvement journey starts here

Intent helps you get the most from OFS and your data, with business efficiency advisors who are experts in change management to help drive your Industry 4.0 and continuous improvement journey, driving results through data and insights, now and into the future.
